

QUIVER POUCH

The QUIVER POUCH is a unique accessory for the bowhunter that allows keeping the release attached to the bow quiver.

To use, remove arrows from your quiver and place the quiver onto the quiver pouch with the hood facing up. Fasten the circular tie snugly around the quiver stabilizers.

Next, remove the attached hook & loop square and place it onto the quiver hood. Fold the hook & loop strip over the square, securing firmly and cut off excess strip. Replace all arrows into the quiver.

To open, pull the tab on top and insert your release. When the release is in your hand, the quiver pouch can easily hold your range finder, cell phone, water bottle, or accessory you need close at hand.
